JOSUE DE OLIVEIRA MOURA

Licensed Electrician NSW

PROFILE

Licensed electrician in NSW with strong theoretical knowledge of the AS/NZS 3000:2018 manual.

Specialized in residential, commercial and industrial services.

It is easy to manage existing customers, installation work and maintenance of small projects simultaneously, to deliver electrical installations that meet tight deadlines.

It has a structured and customer-oriented working method, focusing on quality and maintainability. Highly motivated to work autonomously and as part of a team.

WORK EXPERIENCE

Electrician CESA Electrical Services (Au)

Nov 23 - NOW

Located on Anzac Parade and Bunnerong Road, Kingsford, this development is managed by Taylor will set a student accommodation.

- Safely perform electrical disconnect and reconnect on all types of low-voltage, ensuring compliance with all relevant safety regulations and standards.
- Perform routine maintenance, expert fault finding, and reliable repairs on lighting and power systems.
- Conduct electrical system defect inspections and reports.
- Assist with on-the-job training of apprentices and other employees if required.
- Assist in managing company test and tag procedure and registers.
- Troubleshooting and general electrical repairs and maintenance.
- Completing job cards and time sheets.
- Communicating effectively with customers and suppliers.

EDUCATION

2009 - 2011

M. Sc. Physics.

Universität Bonn

Main thematic priority of those master studies was numerical time series analysis of non-linear dynamical systems. Besides data analysis and transformation, great importance was attached to fast algorithms and efficient software architecture. In the master thesis a numerical approach for the detection of the direction of interaction was proposed. Analysis of this new approach was performed with the help computer simulations to find out its limits and to compare it to another commonly used approaches. This numerical approach was highly optimised for cluster computing and implemented in c++. For those purposes a distributed computing cluster had to be set up and administrated.

2006 - 2009

B. Sc. Physics.

Universität Bonn

The topic for the bachelor's thesis was 'Feshbach resonance'. A numerical application was built to calculate the diagrams.

Electrician TA
Ryan wilks (Au)

Jul 23 - Nov 23

Located on Bankstown-Lidcombe Hospital, this development is managed by Taylor will provide student accommodation. Supply network upgrade project, to deliver an improvement in network reliability and security, as well as increase capacity.

- Running electrical cables, including the installation of containment, trays and conduit.
- Installation of exit and emergency signs, power points and emergency lightings.
- Assist in managing company test and tag procedure and registers.
- Completing job cards and time sheets.
- Communicating effectively with customers and suppliers.

Supervisor contact

Joel ph:0423 455 568

Electrician TA
Health Trade Services (Au)

Apr 23 - Jul 23

Located in the Hospital of Concord, this work was an update to the nurse call system.

- Installing catenary system wire to run the data cable.
- Running data cable based in the drawing.
- Install display, nurse call and TV.
- Before starting work, follow safety rules to avoid accidents.
- Follow housekeeping standards.
- Communicating effectively with customers and suppliers.

Electrician TA
Elecddata Electrical (Au)

Jan 23 - Apr 23

Located on Chullora, this project were a update to an existing rail building.

- Assemble Unit Strut and rod support for installing tray in the air and on the wall.
- Team of two, install the pre-edged structures.
- Running cable Based on wiring diagrams.
- Install light, emergency, sensor, signaling, GPO and distribution board.
- Assist in managing power network test.

CERTIFICATIONS

LPIC 1 - Linux administrator

Certificate issued by the Linux Professional Institute to prove abilities in Linux administration

IBM InfoSphere Advanced DataStage Essentials

Intense course about the ETL technologies and the use of IBM DataStage.

Jump Start Program

Two months full-time training in object oriented programming in Java SE/EE, software development, testing and modern enterprise web-frameworks. Other topics were object oriented design patterns, test-driven development, SQL-databases and webserver in Java environment (Tomcat / Glasfish / JBoss / Jety)

Online Classes

It is important for me to stay up to date with the newest topics in the field of IT. In DevOps it is also important to have a general overview and a hands-on experience on them. Therefore, besides intense article studies, I also keep myself up to date with online classes.

- Assist in managing company test and tag procedure and registers.
- Communicating effectively with customers and suppliers.
